Dear Community Leader,

Re: Furnishings and Equipment List for Denali Commission Prototype Clinic

The Denali Commission is seeking to develop a base furnishings and equipment list for their Prototype Health Clinic. This list is meant to assist communities with developing these requirements when applying to the Denali Commission for a new health clinic.

Enclosed for your review and comment is the subject list. This list was initially developed by Alaska Native Tribal Health Consortium and has been reviewed by an independent health planner. The assist community planners with understanding the type and cost of equipment associated with a primary care clinic, the list contains sample pricing and manufacture information. Actual pricing will be different based upon purchase agreements the community formulates for these items. Your input will help us finalize this list for publication.

Please provide your comments by February 1, 2004 either by E-mail (rmarcil@anthc.org) or mail [to the above address]. Thank you for your assistance in this worthwhile project.

Sincerely,

A handwritten signature in cursive script that reads "Roger Marcil".

Subj: Clinical Equipment review

Ref: Denali Commission Prototype Clinic

LSI PN: 207.00

Dear Roger,

Please find the following Clinical Equipment review for the Denali Commission Prototype Clinic. We found the list provided us to be very thorough and complete. We have made a few recommendations of possible equipment to be added to the list. This recommended list is based upon the review of the Large 2,500 SF prototype clinic plans dated September 2002 and the comprehensive equipment break out list.

Please feel free to contact me with any questions. Thank you.

Sincerely,

LIVINGSTON SLONE, INC.

Robert Meyer, Lab & Medical Equipment Planner

Equipment Breakout List Recommendations - Large Prototype Clinic, 2500 SF

Room 102 / Specialty & Dental

- Fiber optic source light- *Schott Fostec Source 150, 150 watt, fiber rod hand instrument (\$600)*

Consideration for possible Dental Surgery option

- Oximeter
- Electrosurgical cart – *Valleylab Force FX Electrosurgical Generator and cart (\$2,800)*
- Sphygmomanometer
- Anaesthetic gas recovery ventilation
- Anaesthetic gas cart, mobile

Rooms 103, 104, & 110 / Exam

- None

Room 105 / Procedures

- Sphygmomanometer – Infant
- Refrigerator, UC
- Privacy curtain, Tack
- Tele-med machine equip.
- Warming Cabinet- Instruments & blankets
- Smoke Evacuation system

Room 108 / Accessible Restroom

- Specimen pass-thru with Lab option

Room 108a / Lab Option

Nonexpendable Items:

- Eye Wash at sink
- Incubator
- Storage Cabinet, Acid or Chem.
- Fire Blanket
- Computer Station
- Lab Tech stools

Room 113 / Pharmacy Storage

Expendable Items:

- Trash Receptacle, Stainless Steel

Nonexpendable Items:

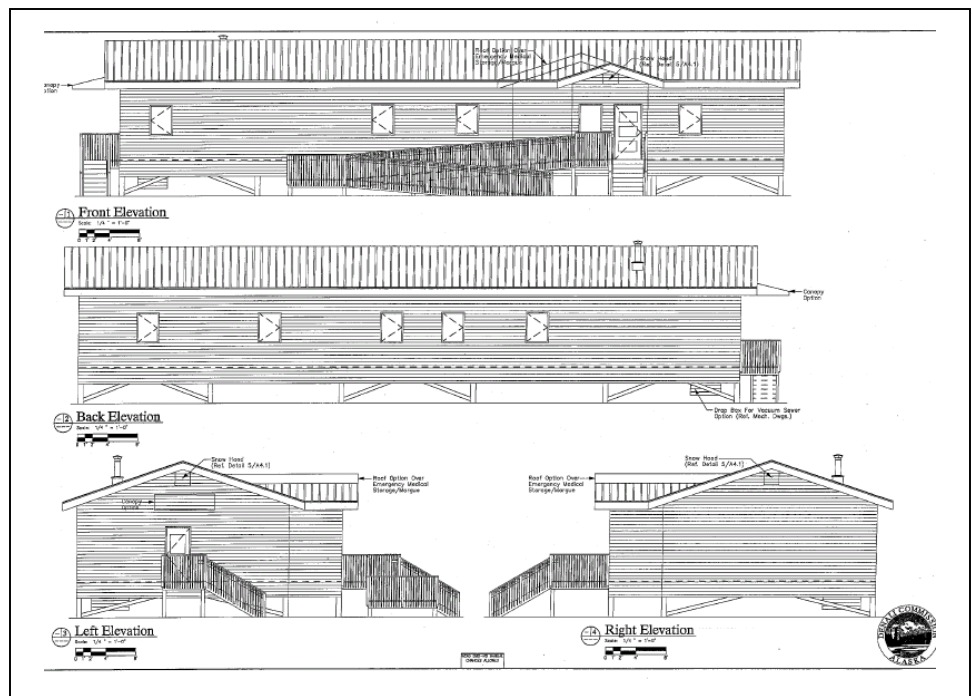

- Computer Station, Printer
- Analytical Balance or Scale

Alaska Native Tribal Health Consortium

Denali Commission

- Tech Stool
- White Board

Nonexpendable Furniture & Equipment Cost Lists for the Denali Commission Prototype Clinic

The lists in this packet detail the costs for nonexpendable furniture and equipment required to provide basic health services from the Denali Commission Prototype Clinic. The Prototype Clinic is designed in three sizes, 1500-square feet, 2000-square feet, and 2500-square feet. Each clinic has a standard layout and options for “swapping out” standard rooms for specialty rooms. The costs lists segregate the standard and options costs to assist the health planner in calculating equipment costs.

Important!! Costs are based upon 2003 Commercial or RS Means® price estimates and do not include shipment to the jobsite. Costs are provided as a basis to begin budgeting and developing an accurate cost estimating.

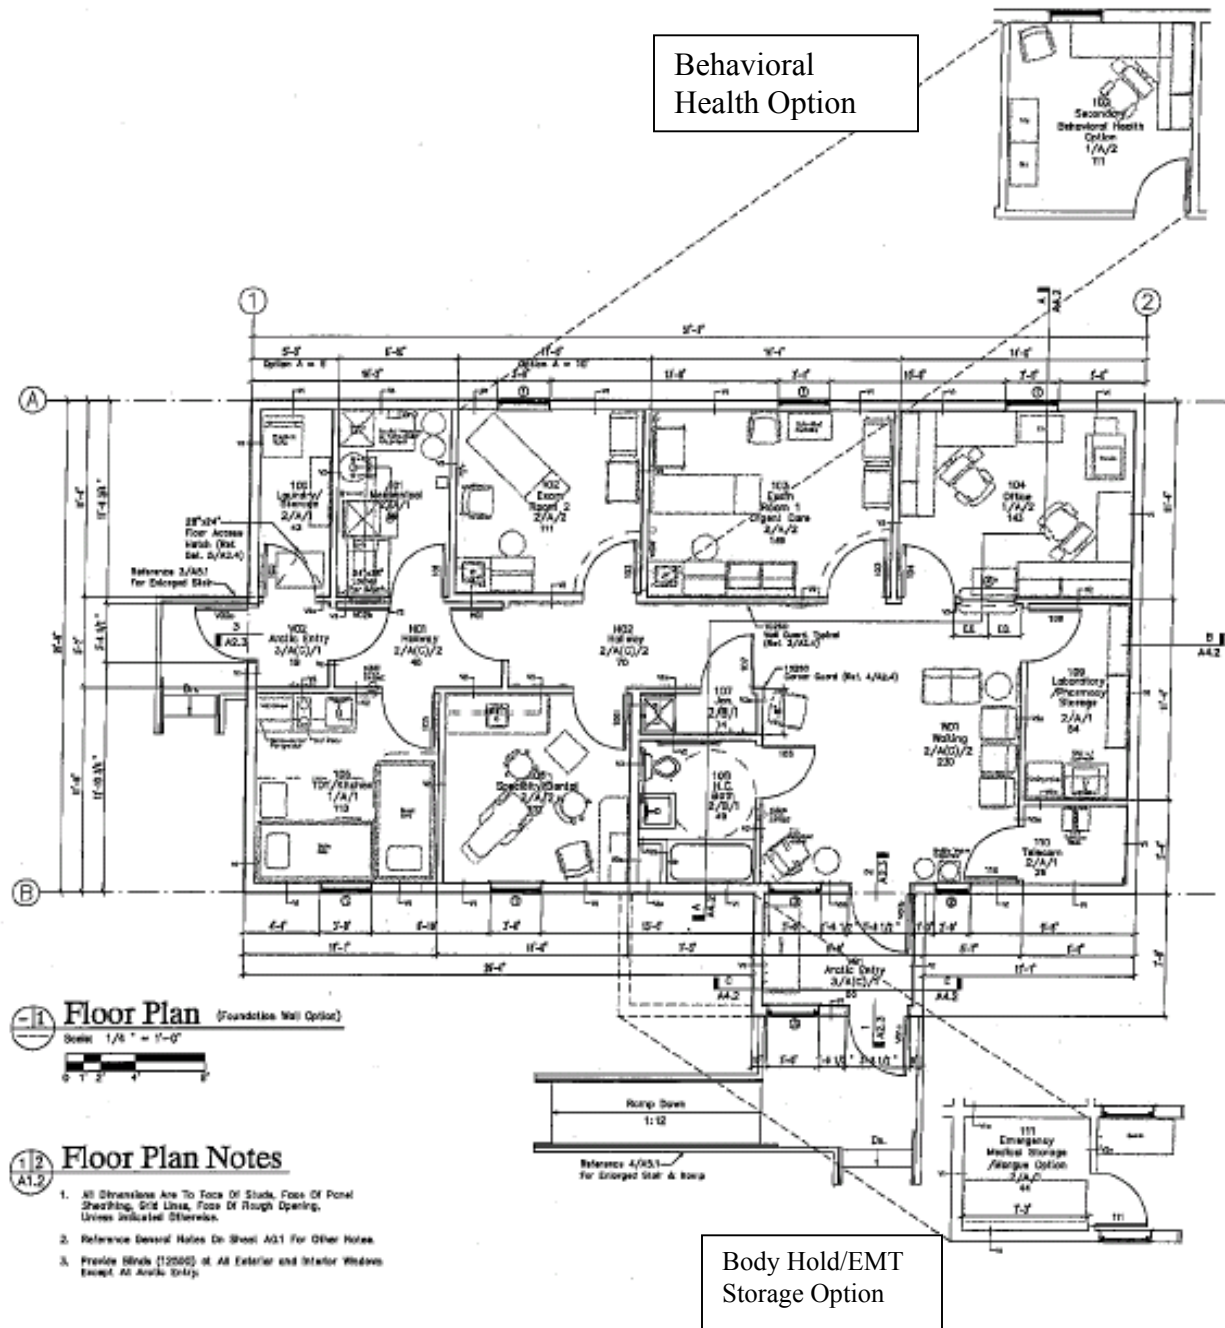

What equipment do these lists cover? With exceptions, the lists include equipment and furniture over \$100 in value. This includes computers, copiers, bunk-room furniture, privacy curtains, modular office furniture, exam tables, mobile x-ray machines, dental operatories, and exam room furniture.

More importantly, what do the lists not cover? The lists do not contain the following:

1. Transportation Costs. Transportation costs must be added to the cost of each item.
2. Telemedicine equipment. This equipment should be purchased and installed by the clinic owner or regional health organization in accordance with their strategic health service delivery plan.
3. Fixtures considered part of the facility. This includes door hardware, bathroom & janitorial fixtures, utility hot water and heating systems, overhead lights, wall rails, and coat hooks. These items should be included in the material takeoff lists and funded with construction monies.
4. Expendable supplies (consumed in use) and durable equipment under \$100, such as stethoscopes, medical supplies, office supplies, bulletin boards, waste cans, paper towels, and signage. The grant recipient is expected to provide these supplies upon occupying the building.

Important!! The lists in this packet are designed to inform the grant recipient of the basic items the Commission believes necessary to furnish and equip the prototype clinic. If the grant recipient desires items not included on this list, they should, 1) request authority from the Commission to expand upon this base list, 2) seek other funds for the additional items, or 3) learn from the construction manager if the additional items are part of the [project] material take-off lists.

1500 SF Clinic Standard Layout & Options

1500 SF Clinic Furnishings & Equipment Cost Summary

1500 SF Clinic – Standard Layout

Room Number	Room Description	F&E Cost
100	Storage & Laundry	\$2,400

1100SP Series Stereo Microscopes

A 12 Fixed Speed Microcentrifuge

- Powerful : 12,000 rpm, 13,030 x g.
- Time saving : Rapid acceleration & braking (min 4 sec.).
- Large choice : 5 Rotors - 60 x 0.25-0.4 ml; 24 x 0.5-0.8 ml; 20 x 1.5 ml; 6 x 1.5 ml; 12 x 2 ml cryotubes, 4 with dust covers.

- Versatile : Accepts all known microcentrifuge tubes including special adaptor for 0.2ml PCR tubes.
- Precise : Digital selection of run time 1-15 min + Hold.

Observation port for accurate speed control.

- Convenient : Flashing seconds timer for accurate control of very short runs.
- Safe : Dual lid interlock; armor plating.

Hinge the full width of the instrument.

Gas strut to support the open lid.

- Rugged : Chemical-resistant baked-on epoxy painted steel casing.
- Space saver : 24 cm wide.
- CE marked.

FURNISHINGS & EQUIPMENT LIST *PROTOTYPE CLINIC*

CLINITEK 50 Urine Chemistry Analyzer

- Distinguishes between hemolyzed and intact red blood cells
- Compact, lightweight (3 lb), portable (9.2" D x 6.0" W x 6.1"H)
- Uses MULTISTIX® 10 SG Reagent Strips
- Chemistries are:
 - Leukocytes
 - Glucose
 - Bilirubin
 - Ketone
 - Specific Gravity
 - Nitrite
 - pH
 - Protein
 - Urobilinogen
 - Blood
- Automatic urine color determination
- Operates on line power or with optional battery pack for alternate site operation
- Battery pack provides approximately 120-test readings and printed results; uses 4 AA batteries
